Notice

- To ensure normal operation of the valve, please consult with professional installation or repairing personnel before use it.
- If there are any of pipeline engineering and electric works, there must be finished by professional at the time of installation.
- Avoid to use valve body or other connectors as support to carry the system.
- Please use this product under the water temperature between 5~50℃, water pressure 0.15~0.6MPa. Failure to use this product under such conditions voids the warranty.
- If the water pressure exceeds 0.6Mpa, a pressure reducing valve must be installed before the water inlet.
- It is suggested to install PPR pipe, corrugated pipe or UPVC pipe, instead of TTLSG pipe.

1. Product Overview

1.1 Main Application & Applicability

Bypass is mainly used for controlling inlet water bypassing in water treatment systems.

Be suitable for the valves of F63, F65, F68, F69, F79, F82 and so on.

When the water softener system needs to be repaired, you can use the bypass function to supply untreated raw water to the outlet.

For residential softener system, too softened water is not suitable for drinking. In order to improve the hardness of the water, use of the bypass valve, and let part of the raw water flow out directly from the outlet, and mixed with softened water.

1.2.Product Characteristics

●Simple structure and reliable sealing

It adopts hermetic head faces with high degree pottery and corrosion resistance for opening and closing. It combines with service, close, bypass and part bypass.

●Easy operation

Can rotate or pull the handle to achieve bypass、 part bypass and softening service function.

●Can internal install flow meter

F70A/F70B/F70C bypass valve can internal install flow meter, and assembled into meter type control valve which with bypass valve.

●Variety of connections

F70A, there are two mutually perpendicular inlets, outlets, based on the need of the inlet and outlet pipeline to connect.

F70C/F70D, there are two kinds of screw threads which are BSPP and NPT for optional.

F70C/F70D

B. Technical Parameters

Nominal pressure: 0.15~0.6Mpa; Suitable temperature: 5°C~50°C

Model	Inlet/Outlet	A (mm) max	B (mm) max	H (mm) max	Flow Rate m ³ /h @0.3MPa
F70A/41104	1" M	165	165	118	4.0
F70B/41102	3/4" M	116/111	140	80	2.0
F70C/41204	1" M	218	126	95	4.0
F70D/41202	3/4" M	220	120	90	2.0

Note: M—Male thread

1.4.Installation

Perform installation according to the relative pipeline regulations and the specification of Water Inlet, Water Outlet.

Installation steps (Such as F70A with valve F63)

- ①Shown in Figure 1-1, get out the clips and female animated nuts from bypass.
- ②Put the washers into the female animated nuts, and tighten with inlet and outlet of F63 control valve.
- ③Bypass valve insert to two female animated nuts in parallel, put the clips back to bypass valve body.
- ④Connect the bypass with water inlet and outlet.

Figure 1-1

2. Usage

2.1.Usage

When the bypass valve handle is at the following position, it could achieve the required functions.

Function	F70A	F70B	F70C/F70D
Service			
Bypass			
Part bypass			
Close

3. Warranty Card

Dear client:

This warranty card is the guarantee proof of RUNXIN brand product. It is kept by client self. You could get the after-sales services from the supplier which is appointed by RUNXIN manufacturer. Please keep it properly. It couldn't be retrieved if lost. It couldn't be repaired free of charge under the below conditions:

1. Guarantee period expired.(One year);
2. Damage resulting from using, maintenance, and keeping that are not in accordance with the instruction.
3. Damage resulting from repairing not by the appointed maintenance personnel.
4. Content in guarantee proof is unconfirmed with the label on the real good or be altered.
5. Damage resulting from force majeure.
